ORLANDO, FL—The Renaissance Orlando at Sea World has completed a five-year, \$35 million renovation project.

Since the refurbishment began in 2006, the hotel has upgraded its 23 second-floor meeting rooms with flexible furnishings and a design scheme based on aquatic tones; added a new signature restaurant with an interactive open kitchen; created a new 8,000-square-foot function lawn for outdoor events; and added R Aqua Zone, an interactive water playground. Additionally, the property's spa and atrium have been enhanced.

The hotel also revamped its 65 guest suites with a more residential, modern design. Among the six different suite types is the Presidential Suite, with a garden tub and expansive balcony and the Corner King Suites, which have sectional sofas and can be connected to a standard King room.
